

RESUME (Qinghua Zeng)

Qinghua received a BSc from the Nanjing University of Aeronautics and Astronautics (NUAA), Nanjing, Jiangsu, P.R.China in 2000 and PhD from the NUAA in Feb. 2006. His doctoral studies investigated the theory and application of GNSS, Inertial Navigation System (INS) & integrated positioning system. In 2007, he was awarded a full scholarship under the UK/China Scholarships for Excellence programme by China Scholarship Council (CSC), and worked at the University of Leeds as a visiting researcher investigating the use of Wireless sensors network in tracking the containers in the port. Now, he is an associate Professor in College of Automation Engineering, NUAA in Navigation, guidance & control. Qinghua has over 20 scientific journal and conference papers published. His research interests are in Global Navigation Satellite System (GNSS), integrated positioning system, Inertial Navigation System (INS) & Localisation in WSNs.
